

Harmonising health and safety standards – paving the way for a strong European wind energy industry

10 JUNE

Online Workshop

Draft agenda

09.50 – 10.00	Virtual doors open
10.00 – 10.10	Opening presentation Wind Harmony project and final recommendations European Commission representative
10.10 – 10.25	Wind Harmony project update (including Q&A) eclareon and WindEurope
10.20 – 11.00	Recommendations for potential harmonisation in health and safety 20 min presentation followed by Q&A with audience RCG
11:00 – 12.30	Stakeholders’ views on Wind Harmony recommendations <i>How can the Wind Harmony recommendations support the work on health and safety?</i>
11.00 – 11.10	A national wind energy association viewpoint Ross McNally, IWEA (TBC)
11:10 – 11:20	A regulator viewpoint Regulator (TBC)
11.20 – 11.30	Virtual coffee break
11.30 – 11.50	A developer viewpoint 2 presentations of 10 min presentation each Onshore and Offshore developer (TBC) or representative of each
11:50– 12.00	A contractor viewpoint Contractor/IMCA (TBC)
12.00 – 12.30	Q&A session with presenters and online audience
12.30 – 13.00	Wrap-up discussions and closing remarks

The Wind Harmony project is examining the key health and safety issues currently facing the European wind industry and seeking to identify potential solutions to those issues. The project is looking at how greater harmonisation across Europe, where appropriate, could improve health and safety performance, reduce costs and improve efficiency. More information on the project can be found at www.windharmony.eu.
